ASSOCIATION OF PLASTIC SURGEONS OF LEBANESE DESCENT - APSLD

A first successful gathering of Plastic Surgeons of Lebanese Descent was organized in August 1999 in Lebanon; it was The First Lebanese-Brazilian Plastic Surgery Meeting. An attempt to organize a second meeting was unfortunately aborted by the 2016 war. Far from surrendering in face of the still unstable situation, once a utopic idea, the Association of Plastic Surgeons of Lebanese Descent - APSLD was officially created in October 2010 in Beirut as a section of the Lebanese Society of Plastic, Reconstructive, and Aesthetic Surgery - LSPRAS. The 1st World Congress of Plastic Surgeons of Lebanese Descent was organized in Beirut. The IInd World Congress of Plastic Surgeons of Lebanese Descent was then organized Cancun, Mexico in October 2012, followed by the IIIrd Word Congress of Plastic Surgeons of Lebanese Descent in Beirut again in October 2014.

This association has great appeal. By holding congresses at regular intervals both in Lebanon and the countries of the Lebanese diaspora, two things can be accomplished. The first is that these unique meetings can serve as an exchange of knowledge and skills and help to “cross pollinate” and spread the world quickly about refining procedures that have not yet been included in mainstream publications. The second and perhaps the more significant accomplishment is the renaissance of cultural ties among its members all of whom connect directly to Lebanon, the birthplace of their fathers and grandfathers and in fact the birthplace of their pride and honor. The mutual bond of plastic surgery transcends the frequent and persistent problems of religion and sectionalism and erases those barriers that hobble many great cultures. As Khalil Gibran wrote, “He who denies his heritage has to heritage”.

The APSLD has grown rapidly and now it is internationally recognized and respected. It has certainly contributed greatly to the current high international standing of LSPRAS. An Executive Committee has been recently formed and National Representatives of 12 countries from Europe and North and South America have been appointed; the APSLD Newsletter is being published regularly online every 3 months. With the IVth the World Congress of Plastic Surgeons of Lebanese Descent in São Paulo, a new high threshold will be reached. Needless to say that the largest group of Plastic Surgeons of Lebanese Descent is in Brazil; their tremendous contribution to Plastic Surgery in Brazil as well as abroad has been instrumental in advancing our knowledge and skills and forging the worldwide widespread popularity of our specialty we are currently enjoying. We are all proud to belong to the APSLD.

Fabio Nahas MD PhD MBA
President of the Congress

Dear colleagues,

It is our pleasure and joy to invite you to participate in the “IV World Congress of Plastic Surgeons of Lebanese Descent”, a tradition that gathers the Lebanese Descents from all over the world as well as many friends from many nationalities. Several years ago the 1st Lebanese-Brazilian Plastic Surgery Meeting was organized and brought to light an amazing connection between the Plastic Surgeons of Lebanese Descents and the Lebanese. This was the first seed of the large 400 members Association of Plastic Surgeons of Lebanese Descents. The Association is spread over many countries and continents. Three congresses came after that first meeting, two in Beirut and one in Cancun, Mexico. This will be probably the meeting in Latin America with the greatest number of speakers with different nationalities (around twenty different countries will be represented) in 2017. The main aim of this meeting is to stress technical refinements, demonstrating technical details, aiming the prevention and treatment of complications. Also, it will give the attendants an idea about the techniques used in different countries. The official language will be English and Portuguese translation will be provided. An International Advisory Committee composed of prominent international Plastic Surgeons is a sure guarantee to the scientific value and quality of this event. Besides free -papers, poster sessions and key note lectures, special round tables with discussion on hot issues will be organized. The Maksoud Hotel venue along with other hotels within very short walking distance will conveniently accommodate all the needs of the Congress. The Maksoud Hotel is located close to the area of Jardins, close to the most exclusive stores of famous world brands, in an area with a rich gastronomy. For in-training residents, there will be a reduced rate of registration fee and, of course a lower rate is applicable for all who wish to take advantage of the <<early bird>> registration. An attractive social program will include the gastronomic experience in São Paulo and an optional pre-congress tour to Rio and to many cities and beaches in Brazil.

We are looking forward to welcoming you in São Paulo for these days full of science, pleasure and friendship. The Organizing Committee will spare no effort to make this event successful and unforgettable for all.

RICARDO BAROUDI

**President of the Brazilian Society of Plastic Surgery
1971/1972, 1978/1979**

Ricardo Baroudi was born in São Paulo, Brazil and graduated from the Faculty of Medicine of São Paulo. His post-graduate training was in the Clinic Hospital of São Paulo University. Six years later, he moved to Campinas with his partner Dr, Edwald Merlin Keppke. Both were pioneers in the specialty in this city which in 1961 had only 230,000 inhabitants.

For the first fifteen years of his professional activities, Dr. Baroudi was involved in both academic and private practices in aesthetic and reconstructive surgery. Later on, he concentrated on aesthetic surgeries until he retired after 52 years of practice.

From 1969-1973, he developed the Plastic Surgery Department of the Medical School of Campinas University, São Paulo State, where he became Chief. During this active period, he combined scientific activities and his private clinic work with the administration of national and international Plastic Surgery societies. He was General Secretary and then twice President of the Brazilian Society of Plastic Surgery; President of the XIIth Brazilian Society of Plastic Surgery Congress in conjunction with the IXth Congress of the Latin American Society of Plastic Surgery in São Paulo (1972); President of the VIIth

International Congress of IPRAS (International Confederation for Plastic and Reconstructive Surgery) in Rio de Janeiro, 1997; President of ISAPS (1995-1997) when he presided over the 14th ISAPS Congress in São Paulo in 1997.

Author of 130 publications in national and international books and journals, Dr Baroudi edited a book on Body Contouring Surgery in 1993. In the first 64 international ISAPS post-graduate teaching courses, he participated in 43. He has served as Editor-in-Chief of the Brazilian Journal of Plastic Surgery since 1996 and the newsletter of IPRAS since 2013. Founder and President of APSLD since 2010, he is now Honorary President.

FARID HAKME

President of the Brazilian Society of Plastic Surgery 1996/1997, 1998/1999

In Botafogo, Rio de Janeiro, Farid Hakme founded on August 11, 1971 a clinic of plastic surgery. It was inaugurated under the name of "Clínica Integrada" and had 1 operating room and 3 patient rooms.

Dr. Hakme is considered a plastic surgery icon in Brazil. He is an alumni of Dr. Ivo Pitanguy, arguably the world's most renowned plastic surgeon.

In 1984, "Clínica Integrada" became "Clínica Interplástica" and its facilities were improved and expanded to 4 operating rooms and 12 patient apartments.

In 2016, "Clínica Interplástica" turned 45 years old. It has now 12 operating rooms and 21 suites. It is now known as "Hospital da Plástica" and is exclusively dedicated to plastic surgery procedures.

Up to the present date, more than 35.000 patients have been subjected to surgical interventions at "Hospital da Plástica". Surgeries carrying risks of contaminating patients are not performed at "Hospital da Plástica". No cases of hospital infection have been reported so far.

It is the only clinic in Brazil to have received the Quality Award from the Brazilian Society of Plastic Surgeons and it is in total conformity with the norms of the Sanitary Vigilance.

The clinic is often inspected by the Conselho Regional de Medicina (Regional Medical Council) - CRM, and it has always met the demands of the aforementioned medical authority.

All the required documents for the functioning of the clinic are regularly updated within legal requirements.

JOSÉ HORÁCIO A B O U D I B

President of the Brazilian Society of Plastic Surgery 2012/2013

José Horácio Aboudib Júnior was born in Cachoeiro de Itapemirim, Espírito Santo. He graduated in Medicine from the UnB – The University of Brasilia – in 1976. At the time, he already showed a bent for Anatomy, so much that he was chosen as monitor of that academic discipline for three semesters. Determined to study plastic surgery, he moved to Rio de Janeiro, where he started internship (sixth year in 1976) and residency in general surgery (1977 and 1978) at UERJ - The University of Rio de Janeiro. During the following three years, he took a specialization course in plastic surgery with Professor Ivo Pitanguy, whose ideas he shares and with which he has a strong bond: a number of times he took part in the Scientific Committee and worked as president of the AEXPI - Professor Ivo Pitanguy's Ex-students Association (Former Students, Alumni Association). Since the graduation with Professor Pitanguy, Aboudib has been dedicating himself to private clinic and has operated on thousand of the patients.

José Horácio is a specialist and a regular member of the SBCP (Brazilian Society of Plastic Surgery). He is also a coordinator of Plastic Surgery Department at UERJ.

Several times, he took part in the SBCP Scientific Committee, RJ regional branch, in which he was president from 2000 to 2001. Within the national context, he was director of DEC (Department of Scientific Events of the SBCP), responsible for all scientific activities and also for the organization of trips and conferences for that society during the 2006-2007 administration. He was President of the Brazilian Society of Plastic Surgery - Biennium 2012/2013.

Concerning his academic life, in 1983, Aboudib took a public examination to enter UERJ as a professor of plastic surgery, and he won first prize. He currently works there not only as a coordinator of that discipline but also as a vice chief of the General Surgery Department.

José Horácio Aboudib is a member of some important institutions, such as: ASAPS (American Society of Aesthetic Plastic Surgery); and the FILACAP (Latin American Federation of Plastic Surgery).

TEMAS LIVRE

O IV World Congress of Plastic Surgeons of Lebanese Descent tem como uma de suas características o incentivo à participação de médicos cirurgiões plásticos e, por isso, oferece a oportunidade de envio de **TEMAS LIVRES**.

Apenas membros da Sociedade Brasileira de Cirurgia Plástica e de outras sociedades internacionais de Cirurgia Plástica poderão ter os temas livres aceitos no congresso.

Para apresentar **TEMA LIVRE**, o candidato deverá enviar um trabalho científico, na condição de autor ou co-autor, e estar inscrito no congresso.

O resumo, em português, deverá ser enviado para o email cientifico@intimeeventos.com.br data limite para envio é 20 de março de 2017. Maiores informações consulte "Temas Livres" no site do Congresso: www.wcplasticsurgeryapsld.com

A seleção dos trabalhos será feita pelo Comitê APSL Brasil, levando em conta o mérito científico. O resultado será divulgado até o dia 03 de abril de 2017.

TRADUÇÃO SIMULTÂNEA

Haverá tradução simultânea em tempo integral de língua inglesa. Utilize-se dos fones de tradução quando necessário apresentando um documento pessoal com foto. A responsabilidade na devolução do equipamento e da retirada do documento é única e exclusiva do congressista. Não teremos tradução na sala dos Temas Livres.
